

Independent quantum computing price reference: cloud QPU rates and hardware purchase prices from primary sources. Operated by Digital Signet (UK).

Who reads it

About 450 search visits a month from people pricing quantum computers, processors and cloud access - the head query "quantum computer price" plus named hardware such as IBM Heron and System Two.

Notable: the site ranks position 3.8 on "ibm quantum price" (24 impressions/28d). A founding-sponsor placement sits in front of that intent every day.

The AI-citation layer

- **22 sessions/month arrive from AI assistants:** buyers who asked an AI engine and were sent to this reference.
- AI engines increasingly answer pricing questions from independent editorial. Sponsorship buys association with that neutrality, never influence over it.

Sponsorship

- **One slot, category-exclusive.** One sponsor in the category while the slot is held.
- A disclosed strip across the reference, plus a labelled note below the calculator results in the sponsor's words. Never inside a result or a ranking; no other advertising on the site.
- Sponsorship has no influence on pricing data, rankings or conclusions; competitors remain in the coverage, computed identically.
- Monthly measured report: placement impressions, clicks, page-level traffic and AI-citation monitoring.
- Current rate and terms: quantumcomputingcost.com/sponsorship.

Precedent

- Category-exclusive founding sponsorship is live on our sister site siemcostcalculator.com (Cribl, signed 4 August 2026, reporting monthly). The same structure is available here.
